MAGNOLIA

AESTHETICS & WELLNESS

Tempsure Envi/RF Skin Tightening

Pre Care

- Following products MUST BE STOPPED 48 hours prior to doing treatment: All retinol products such as Retin A, Tazorac, Triluma, Differin, and Vitamin C.

Day of Treatment

- Hydrate well.
- Do not wear any make up or skincare products in the treated area.
- Remove all metal and jewelry.
- No numbing required

Post Care

- Some patients may experience mild swelling (edema) and redness (erythema), typically resolving within 2 -24 hours after treatment. If pink or red >> avoid hot water. Wash skin with tepid water and gentle cleanser.
- Avoid hottubs, saunas, steam rooms, and exercise post treatment.
- Make up can be applied immediately after, if desired.
- A non-exfoliant cleanser and light moisturizer can be used the day of treatment. You can resume normal skin care the next day.
- Waxing, tweezing and depilatory creams can be used 3 days post treatment.
- All skin irritants (glycolic/salicylic acids, benzoyl peroxide, retinol products, or vitamin C.) can be resumed 3 days post treatment.
- An SPF 30 or higher UVA and UVB protection will be applied immediately post treatment. Please continue to apply sunblock daily to maximize your results and minimize irritation.
- Chemical peels, tox treatments and dermal fillers can be resumed in one week post your treatment.
